Recent Changes in Tax Laws Affecting LLC's -- An Opportunity to Defer Cancellation of Indebtedness Income

One of the most significant hurdles in structuring a suitable debt workout or restructuring arrangement between a lender and a borrower involves the negative impact of U.S. income taxes on the borrower. When a borrower reduces or cancels its outstanding indebtedness for less than the full amount due, the borrower is deemed to realize taxable income on the amount of the reduction under U.S. federal income tax laws. This cancellation of indebtedness ("COI") income is subject to many nuances and exceptions under U.S. federal income tax laws, the primary exception being that an insolvent debtor can avoid COI income to the extent it is insolvent. Similarly, a bankrupt borrower can also avoid recognizing COI income. A borrower may also avoid COI income recognition if the debt constitutes "qualified real property business indebtedness" (QRPBI).
